

PROFILE

Hey there! I'm Sourav, a passionate second-year student diving deep into the world of Computer Science and Engineering.

MY PROJECTS

Streamify

(Social Video Platform Backend)

- Architected Node.js, Express.js, MongoDB, Mongoose, JWT, Cloudinary sharing and social networking features
- Secured user authentication using JWT tokens and bcrypt, handling user sessions and password management
- Optimised database queries with MongoDB aggregation pipelines and implemented pagination for large datasets
- Integrated Cloudinary CDN for efficient video/image storage and delivery, reducing server load by handling media externally
- Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, Cloudinary, Multer

Youtube title generator

Developed an event-driven backend application using Motia framework and TypeScript that leverages OpenAI GPT-4 to generate SEO-optimised YouTube video titles. Implemented a 9-step automated workflow integrating YouTube Data API v3 for channel/video retrieval, OpenAI API for AI-driven title suggestions with rationale, and Resend API for email delivery.

Tech Stack: Node.js, TypeScript, Motiastatus tracking, incorporated OAuth 2.0 authentication for YouTube integration, and designed a freemium model with usage limits and state management for job tracking and error handling.

Tech Stack: Node.js, TypeScript, Motia, OpenAI GPT-4o-mini, YouTube Data API v3, Resend API

Education & Certificates

B.Tech in Computer Science & Engineering, Ghaziabad, India

2024-2028

Webdev bootcamp from chaicode academy

jan26 - present

Technologies & Languages

JavaScript, MERN, React.js, , Node.js, Next.js, SQL, MongoDB, REST APIs, TypeScript,
MongoDB, Mongoose ODM , Express, Git, GitHub, HTML, CSS, Acternity UI, Tailwind CSS
