SUMMARY

Full-stack developer and Computer Science undergraduate with hands-on experience building scalable backend systems, RESTful APIs, and AI-integrated applications. Proficient in the MERN stack, TypeScript, and cloud-connected architectures. Passionate about writing clean, production-grade code and solving complex engineering problems at scale.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Aceternity UI
Backend: Node.js, Express.js, REST APIs, JWT Authentication, bcrypt, OAuth 2.0, Multer
Databases: MongoDB, Mongoose ODM, SQL
Cloud & DevOps: Cloudinary CDN, Git, GitHub, Linux
AI & APIs: OpenAI GPT-4o (API integration), YouTube Data API v3, Resend API, Motia Framework
Concepts: Data Structures & Algorithms, System Design (basics), Agile, MVC Architecture

PROJECTS

- Streamify** – *Social Video Platform Backend* | Node.js, Express.js, MongoDB, JWT, Cloudinary 2025
- Architected a production-ready RESTful backend for a social video and networking platform supporting user authentication, video uploads, subscriptions, likes, comments, and feed features.
 - Implemented secure authentication using JWT tokens and bcrypt password hashing, with robust session and refresh-token management for stateless, scalable auth flows.
 - Optimised read-heavy endpoints using MongoDB aggregation pipelines and cursor-based pagination, reducing query response time on large datasets by an estimated 40%.
 - Integrated Cloudinary CDN for video/image storage and adaptive delivery, offloading all media processing from the application server and cutting server bandwidth usage significantly.
 - Tech Stack:** Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Cloudinary, Multer
- YouTube Title Generator** – *AI-Powered Automation Tool* | Node.js, TypeScript, OpenAI, OAuth 2.0 2025
- Built an event-driven backend application using the Motia framework and TypeScript that automates SEO-optimised YouTube title generation via OpenAI GPT-4o-mini.
 - Engineered a 9-step automated workflow integrating YouTube Data API v3 for channel and video data retrieval, OpenAI API for AI-driven title suggestions with reasoning, and Resend API for email delivery.
 - Implemented OAuth 2.0 authentication for YouTube API integration and designed a freemium model with usage-limit enforcement, job-state management, and end-to-end error handling.
 - Tech Stack:** Node.js, TypeScript, Motia, OpenAI GPT-4o-mini, YouTube Data API v3, Resend API

EDUCATION

- Raj Kumar Goel Institute of Technology** Ghaziabad, India
Bachelor of Technology – Computer Science & Engineering Sep 2024 – Aug 2028
- Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP
- Chaicode Academy** Online
Web Development Bootcamp – Full-Stack JavaScript (MERN) Jan 2026 – Present
- Intensive training covering React.js, Node.js, Express.js, MongoDB, Next.js, REST API design, and deployment.

CERTIFICATIONS & ACHIEVEMENTS

- Certificate of Participation** – Changethon, National Social Summit 2026 (National-level tech-for-social-impact hackathon)
- Actively solving Data Structures & Algorithms problems on LeetCode to prepare for SWE technical interviews
- Built and shipped two end-to-end backend projects integrating third-party APIs, AI services, and cloud infrastructure
